

Tonton Mensah

FULLSTACK DEVELOPER

mensahkbiz@gmail.com +233 548 456 600 github.com/tontonvs Accra, GH

Fullstack developer based in Accra, Ghana, building offline-first mobile apps and premium marketing websites with React, TypeScript, and Supabase. Comfortable across the full stack — from mobile architecture and backend data layers to motion-driven frontend design — with additional experience in media editing and setting up AI-assisted systems and workflows.

SKILLS

Frontend

React, TypeScript, Tailwind CSS, TanStack Router/Query, Framer Motion

Backend & Data

Supabase, PostgreSQL, SQLite, Row Level Security

AI & Systems

Setting up and integrating AI-assisted tools and workflows

Mobile

Capacitor, Android build pipeline (Gradle, Java toolchain)

Tooling & DevOps

Vite, GitHub Actions (CI/CD), Git

Media

Media editing

PROJECTS

Grace Connect

MOBILE APP

React, TypeScript, Capacitor, Supabase, SQLite, Tailwind CSS

- Built an offline-first church community app with a local-first SQLite sync layer, keeping chat and feeds usable through unreliable connections
- Implemented full list virtualization across chat and feed views for smooth performance at scale
- Designed a consistent glassmorphism UI system spanning navigation, chat, search, and settings
- Set up CI/CD with GitHub Actions to automate Android APK builds

Labianca Frost

MARKETING WEBSITE

React, TypeScript, TanStack Router, Tailwind CSS, Framer Motion

- Built a marketing site for a Ghanaian frozen foods company with a strict, accessibility-conscious motion design system
- Developed a recognition timeline component and an accessible FAQ accordion
- Redesigned the site navigation with a glassmorphism treatment consistent with the rest of the brand
