

Tonton Mensah

FULLSTACK DEVELOPER

mensahkbiz@gmail.com +233 548 456 600 github.com/tontonvs Accra, GH

Fullstack developer based in Accra, Ghana, building offline-first mobile apps and premium marketing websites with React, TypeScript, and Supabase — increasingly directing AI coding agents (Claude Code) to move faster through feature development, debugging, and iterative design. Comfortable across the full stack, from mobile architecture and backend data layers to motion-driven frontend design, with additional experience in media editing and AI systems integration.

SKILLS

Frontend

React, TypeScript, Tailwind CSS, TanStack Router/Query, Framer Motion

Backend & Data

Supabase, PostgreSQL, SQLite, Row Level Security

Languages

TypeScript, C, Python

Version Control

Git, GitFox

Media

Media editing

Mobile

Capacitor, Android build pipeline (Gradle, Java toolchain)

Cloud

AWS, Azure

Tooling & DevOps

Vite, GitHub Actions (CI/CD)

AI & Systems

Directing AI coding agents (Claude Code) for full-cycle feature development, debugging, and iterative design

PROJECTS

Grace Connect

MOBILE APP

React, TypeScript, Capacitor, Supabase, SQLite, Tailwind CSS

Live: grace-connect-streams.lovable.app

- Built an offline-first church community app with a local-first SQLite sync layer, keeping chat and feeds usable through unreliable connections
- Implemented full list virtualization across chat and feed views for smooth performance at scale
- Designed a consistent glassmorphism UI system spanning navigation, chat, search, and settings
- Set up CI/CD with GitHub Actions to automate Android APK builds
- Directed AI coding agents through iterative debugging and design refinement, including CI/CD troubleshooting and database policy fixes

Labianca Frost

MARKETING WEBSITE

React, TypeScript, TanStack Router, Tailwind CSS, Framer Motion

Live: labianca-gh.lovable.app

- Built a marketing site for a Ghanaian frozen foods company with a strict, accessibility-conscious motion design system
- Developed a recognition timeline component and an accessible FAQ accordion
- Redesigned the site navigation with a glassmorphism treatment consistent with the rest of the brand
